Project need

Currently our organization does not have a website so this project would start from scratch. We are reaching out to gain website design and website development which will have a direct effect on the growth of the organization and the people behind it. We need a professional designer to help ensure that our new website looks dynamic and

fresh in order to communicate the value of our mission, raise brand awareness, and draw supporters for our cause by crafting and sharing our stories through more video and not as much text. It should have a powerful impact on viewers in a really short amount of time. Collecting donations should be our website's number one goal, and the design should make that task easy for people to accomplish. This will be exciting for someone who wants to update their portfolio and show their creativity by taking this website from start to finish.

We are a newly formed non-profit organization in Sarasota, Florida. A group of like-minded individuals came together to combat the issues of homelessness as the City of Sarasota answer to the homeless problem was to supply them with a bus ticket and a small cash incentive to leave. The National Coalition on Homelessness voted the City of Sarasota as the worst city in America as to how they treat homeless persons.

We have most of the text prepared along with mission statement and newly completed logo. We are producing our videos at present to be incorporated in the website.

Organization's mission

Our purpose is to build new and rehabilitate rental housing to accommodate low-income, homeless, and the less fortunate individuals of Florida. To supply social services that will enable them to achieve the greatest social and economic independence at the lowest cost to society.

Taproot+ creates new opportunities for nonprofit professionals and skilled volunteers to connect and engage in pro bono by consolidating information and resources for the market. Taproot+ is a program of the [Taproot Foundation](#).
